Computing Programming Progression								
	Nursery	Reception	Y1	Y2	Y3	Y4	Y5	Y6
NC	Using Beebots	Using Beebots	<p>Programming A – Moving a robot</p> <p>Programming B – Programming animations</p> <p>Understand what algorithms are; how they are implemented as programs on digital devices; and that programs execute by following precise and unambiguous instructions</p> <p>Create and debug simple programs</p> <p>Use logical reasoning to predict the behaviour of simple programs</p> <p>Use technology purposefully to create, organise, store, manipulate and retrieve digital content</p> <p>Recognise common uses of information technology beyond school</p>	<p>Programming A – Robot algorithms</p> <p>Programming B – Programming Quizzes</p> <p>Understand what algorithms are; how they are implemented as programs on digital devices; and that programs execute by following precise and unambiguous instructions</p> <p>Create and debug simple programs</p> <p>Use logical reasoning to predict the behaviour of simple programs</p> <p>Use technology safely and respectfully, keeping personal information private; identify where to go for help and support when they have concerns about content or contact on the internet or other online technologies.</p>	<p>Programming A – Sequencing Sounds</p> <p>Programming B – Events and actions in programs</p> <p>Design, write and debug programs that accomplish specific goals, including controlling or simulating physical systems; solve problems by decomposing them into smaller parts</p> <p>Use sequence, selection, and repetition in programs; work with variables and various forms of input and output</p> <p>Use logical reasoning to explain how some simple algorithms work and to detect and correct errors in algorithms and programs</p> <p>Select, use and combine a variety of software (including internet services) on a range of digital devices to design and create a range of programs, systems and content that accomplish given goals, including collecting, analysing, evaluating and presenting data and information</p>	<p>Programming A – Repetition in Shapes</p> <p>Programming B – Repetition in Games</p> <p>Design, write and debug programs that accomplish specific goals, including controlling or simulating physical systems; solve problems by decomposing them into smaller parts</p> <p>Use sequence, selection, and repetition in programs; work with variables and various forms of input and output</p> <p>Use logical reasoning to explain how some simple algorithms work and to detect and correct errors in algorithms and programs</p> <p>Select, use and combine a variety of software (including internet services) on a range of digital devices to design and create a range of programs, systems and content that accomplish given goals, including collecting, analysing, evaluating and presenting data and information</p>	<p>Programming B – Selection in Quizzes</p> <p>Design, write and debug programs that accomplish specific goals, including controlling or simulating physical systems; solve problems by decomposing them into smaller parts</p> <p>Use sequence, selection, and repetition in programs; work with variables and various forms of input and output</p> <p>Use logical reasoning to explain how some simple algorithms work and to detect and correct errors in algorithms and programs</p> <p>Select, use and combine a variety of software (including internet services) on a range of digital devices to design and create a range of programs, systems and content that accomplish given goals, including collecting, analysing, evaluating and presenting data and information</p> <p>Microbit computing/DT project: programming project Designing a gadget that either responds to changes in light level or temperature</p> <p>https://microbit.org/lessons/data-handling-unit-summary/</p>	<p>Teach Computing Programming A – Variables in Games</p> <p>Teach Computing Programming B – Sensing (Lessons 1-4) Then Micro:bit computing/DT project Children can choose between: Simple door alarm micro:bit (microbit.org)</p> <p>Simple tilt alarm micro:bit (microbit.org)</p> <p>Pressure switch alarm micro:bit (microbit.org)</p> <p>Design, write and debug programs that accomplish specific goals, including controlling or simulating physical systems; solve problems by decomposing them into smaller parts</p> <p>Use sequence, selection, and repetition in programs; work with variables and various forms of input and output</p> <p>Use logical reasoning to explain how some simple algorithms work and to detect and correct errors in algorithms and programs</p> <p>Select, use and combine a variety of software (including internet services) on a range of</p>

								digital devices to design and create a range of programs, systems and content that accomplish given goals, including collecting, analysing, evaluating and presenting data and information
Concrete knowledge/skill progression	I can make a Bee Bot move with support	I can use simple instructions to guide a Bee Bot	<p>Programming A:</p> <p>I can compare forwards, backwards, left and right turns.</p> <p>I can predict the outcome of a sequence of forwards, backwards, left and right commands.</p> <p>I can use two different programs to get to the same place.</p>	<p>Programming A:</p> <p>I can follow a sequence.</p> <p>I can predict the outcome of a sequence.</p> <p>I can use an algorithm to program a floor robot.</p> <p>I can create an algorithm to meet my goal.</p> <p>I can test and debug each part of the program</p>	<p>Programming A:</p> <p>I can recognise that commands in Scratch are represented as blocks.</p> <p>I can identify that each sprite is controlled by the commands I choose.</p> <p>I can create a sequence of connected commands.</p> <p>I can build a sequence of commands.</p>	<p>Programming A:</p> <p>I can explain the effect of changing a value of a command.</p> <p>I can test my algorithm in a text-based language.</p> <p>I can predict the outcome of a program containing a count-controlled loop.</p> <p>I can use a procedure in a program.</p>	<p>Micro:bit DT/Computing project</p> <p>I know that mechanical and electrical systems have an input, process and output</p> <p>I know how more complex electrical circuits and components can be used to create functional products</p> <p>I know how to program a computer to monitor changes in the environment and control their products</p> <p>I understand what data is, how to classify it and how it might be used.</p> <p>I can write a simple program using sensors</p> <p>I can use a micro:bit to collect data</p> <p>I can write a problem using that uses data as a condition</p> <p>I can write a program to use a micro:bit as a digital assistant</p>	<p>Programming A:</p> <p>I can identify examples of information that is variable.</p> <p>I can make use of an event in a program to set a variable.</p> <p>I can recognise that the value of a variable can be used by a program.</p>

			<p>Programming B:</p> <p>I can use commands to move a sprite.</p> <p>I can use a Start block in a program.</p> <p>I can find blocks that have numbers and change their value.</p> <p>I can add and delete sprites.</p>	<p>Programming B:</p> <p>I can identify the start of a sequence.</p> <p>I can predict the outcome of a sequence of commands.</p> <p>I can work out the actions of a sprite in an algorithm.</p>	<p>Programming B:</p> <p>I can explain the relationship between an event and an action.</p> <p>I can program movement.</p> <p>I can match a piece of code to an outcome.</p> <p>I can evaluate my project.</p>	<p>Programming B:</p> <p>I can choose when to use a count-controlled and an infinite loop.</p> <p>I can evaluate the use of repetition in a project.</p> <p>I can identify which parts of a loop can be changed and explain the effect of my changes.</p>	<p>Programming B:</p> <p>I can identify conditions in a program.</p> <p>I can create a program with different outcomes using selection.</p> <p>I can identify the outcome of user input in an algorithm.</p> <p>I can show that a condition can direct program flow in one of two ways.</p> <p>I can test my program, share it with others and identify ways in which it can be improved.</p>	<p>Micro:bit computing/DT project</p> <p>I can use variables to control an output.</p> <p>I can identify and correct bugs in a program.</p> <p>I can refine a program to improve its efficiency.</p> <p>From DT...</p> <p>I know that mechanical and electrical systems have an input, process and output.</p> <p>I know how more complex electrical circuits and components can be used to create functional products</p> <p>I know how to program a computer to monitor changes in the environment and control their products</p>
Vocabulary			<p>Floor robot/BeeBot, direction, command, forwards, backwards, left, right, turn, program, debug</p> <p>Sprite, block, algorithm, background, delete</p>	<p>Sequence, unambiguous, predict, code</p> <p>Outcome, project</p>	<p>Programming environment, objects, backdrops, attribute, motion, event block, sound, costume</p> <p>Event, navigate, bug, evaluate</p>	<p>Code snippet, text-based language, repeat, pattern, count-controlled loop, decomposition, procedure,</p> <p>Infinite loop, output, animation</p>	<p>Microbit, program, input, output, algorithm, sequence, variable, connection, positive, negative</p> <p>Storyboard, binary question</p>	<p>Variables, simulation, 'use-modify-create' model, letters (strings), event</p> <p>Analogue, digital, selection, LEDs, sensor, trigger, audio, visual, device</p>
Software/Hardware	Beebots	Beebots	BeeBots, Scratch Jr.	BeeBots, Scratch Jr.	Scratch	Logo, Scratch	Micro:bit, scratch, Makecode editor	Scratch, Crumble controller
